

DEVEN FULTON

I am a "Creative." I love working with my hands, whether that means designing a website, making photographs, mixing music, or editing together a video.

One thing I have always enjoyed is solving puzzles. My passion for design not only comes from the visual standpoint of how something looks on the surface, but also how all of the individual pieces come together to form a larger picture and a successful storyteller.

Through the layout of a logo, the pacing of a video or even the code of a website, I enjoy all of the puzzles that I get to solve as a designer.
